EXECUTIVE SUMMARY

Full-Stack Software Engineer and Entrepreneur with extensive expertise in architecting high-availability web systems and robust African & global fintech payment pipelines (**Safaricom M-Pesa**, **Jenga API**, **Paystack**, **Stripe**). Active Software Engineer at **Apex.io** with rigorous engineering training from **Moringa School** and **KCA University**. Founder and Lead Architect of **SomaHome Kenya**, an automated turnkey multi-curriculum homeschool and micro-school operating system scaling accessible education across East Africa.

VENTURE & PROFESSIONAL EXPERIENCE

SomaHome Kenya — *Founder & Lead Architect*

Nairobi, Kenya | 2025 – Present

- **Multi-Curriculum Platform Architecture:** Engineered a turnkey modular Homeschool OS supporting 5 national & international curricula (Kenya CBC Grade 1–9, British Cambridge, US Common Core, A.C.E., Montessori) across 204+ instructional weeks.
- **Multi-Gateway Fintech Engine:** Architected automated payment processing supporting **Safaricom Daraja M-Pesa (STK Push)**, **Paystack**, and international card payments via **Stripe** for digital term subscriptions and physical kit checkouts.
- **Voice AI & E-Reader Integration:** Built client-side dual-language (English / Kiswahili) Voice AI synthesis and an interactive in-app KICD curriculum E-Reader with real-time phonetics playback and custom PDF/Text uploaders.
- **Continuous CBA Assessment Engine:** Designed continuous formative assessment tracking aligned with official KNEC Rubrics (EE, ME, AE, BE) with cryptographic teacher verification stamps and 1-click batch multi-child PDF transcripts.

Apex.io — *Software Engineer*

Nairobi, Kenya | 2023 – Present

- **Full-Stack Cloud Engineering:** Build and maintain scalable, high-throughput web applications and microservices using **Python (Django, FastAPI)**, **Next.js**, **React**, **TypeScript**, and **PostgreSQL**.
- **Fintech & Banking Integrations:** Integrated enterprise banking and payment APIs including **Jenga API (Equity Bank)**, **Paystack**, and **M-Pesa B2C/C2B** for real-time transaction reconciliation and webhook processing.
- **Performance & Scale:** Optimized database queries, Redis caching layers, and asynchronous Celery task queues, reducing critical API response latency by over 35%.
- **Engineering Rigor & CI/CD:** Enforce code quality through automated unit/integration test suites (PyTest, Jest), Docker containerization, and continuous delivery pipelines.
